Q5015 Rules

- ** Street legal with license and insurance - **must provide at inspection**
- ** **Must be driven to the event (not hauled in)**
- ** 26" hitch height, pull from bumper or Reese hitch only, must provide clevis
- ** DOT approved tires only
- ** Safety chains or loops on drive shafts
- ** Pump fuel only
- ** Aluminum intake and headers allowed. Exhaust has to exit behind cab
- ** Weights in bed must be secure. May run front weights but must be secure
- ** Traction bars and blocked suspension allowed
- ** No aluminum heads - cast iron only
- ** No sanctioned pulling trucks
- ** No nitrous based fuels or water injection allowed
- ** All trucks must have drive shaft shield around U joint. It must be 4" from center of U joint both ways, made from 1/8" thick steel, and can be bolted together using 3/8" bolts. Shield can be maximum 4" larger than the drive shaft.
- ** Class limited to the first 25 entries
- ** **No whining** - Judges decisions are final and take precedent over printed material
